"A"

GENERAL FUND TAX HISTORY.

The primary purpose of this compilation was to establish a table, where-by as near a definite idea as possible may be had, of the amount of the tax delinquency which would exist at the close of each calendar year.

Summary "G" sets forth this purpose.

Two periods of financial depression are clearly apparent, viz: 1893 with a slow recovery and 1907 with but small effect, and it may be reasonably expected that of any future tax levy, collections on December 31st will stand about as follows, percentage given being the averages of 23 completely collected levies:

Collected first year	89.78 %
second year	5.16
third year	1.58
fourth year	.82
fifth year	.38
sixth year	.34
seventh year	.07
uncollected	1.87
Total	100.00 %

The efforts of the present State Administration have been to keep the expenditures within the revenues provided. To accomplish this it was desired that the amount of tax be known which had been collected from the new levy and received by the State Treasury prior to April 1st, this amount to be kept from expenditure on audited claims originating before April 1st.

A tax levy is made in September of each year and is collectible in the February following. The appropriation expenditure period of the State begins April 1st. biennially, and the revenue provided by the

preceding levy is supposed to be available for expenditure for the year commencing that date. As a matter of fact, collections of the current roll received by the State Treasurer before the close of the biennial period at April 1st., have been disbursed for debts contracted in the past biennium and before the expenditure period of the appropriations for which the levy was made.

The following explanation and copy of a County quarterly report will show why this amount can not be ascertained from the available State records.

There are always seven rolls in process of collection, the current levy for the year and the uncollected or delinquent balances of the six preceding rolls. Collections from the delinquent rolls are applicable to claims prior to April 1st. and the current roll collections for claims incurred there-after.

The following is a copy of the first quarterly report for 1922 from Asotin County.

Collections 1922.		Remittances to State Treasurer, 1922.	
1921, current roll	$ 4,048.11	Feb. 14, 1922	$ 225.13
1920, delinquent roll	1,132.30	March 10, 1922	2,356.35
1919, " "	85.86		
1918, " "	.18		
1917, " "	0.		
1916, " "	0.		
1915, " "	0.		
Total collected	$ 5,266.45	To State Treas.	$2,581.98
Bal. of first quarter collection held by County at Mar. 31,			2,684.47
			$5,266.45

It will be seen from the above that the current roll collections for the quarter ending March 31st. were $4,048.11, delinquent collections

17D 24ex

were $1,218.34, a total collected of $5,266.45. Total remittances of the above collections to reach the State Treasury before April 1st. were $2,581.98. It is impossible to determine from the above information what portion of the current roll collection of $4,048.11 is included in the remittance to the State. Under the present system of tax reporting by the Counties of the State, a report like the preceding copy from each County, constitutes the State records and from them the amount of the current tax received by the State Treasury prior to April 1st. cannot be determined.

EXPLANATION OF STATEMENTS AND PROCEDURE OF ASSEMBLING SAME.

The statements of the following General Fund Tax History were compiled from the State Auditor's records of tax accounts with the various Counties. These records were made from the quarterly reports of the County Treasurers to the State Auditor. County remittances of tax collections are made in the month following collection. Collections as shown in this History give the correct year to which collection should be credited but not the time shown as received by the State Treasurer's books.

State Auditor's records and statements compiled there-from.

In the State Auditor's Tax Ledgers an account is carried with each County for its portion of each yearly levy as made by the State Committee. Credited to these levies are the collections as contained in the County quarterly reports. As there are seven rolls in process of collection it will thus be seen that the Auditor's records contain seven active accounts with each of the thirty nine Counties.

Detail sheets numbered 1 to 58 were taken from these County accounts. Those sheets show the thirty nine Counties assembled to make

the total for the State of each yearly levy. Collections are shown by each of the seven years in which a levy was collectible with the uncollected balance which under the law was no longer collectible as delinquent tax but becomes part of the next levy.

For comparative purposes these yearly levies and their collection figures were assembled on SUMMARY SHEET "H". This summary was made up from totals of sheets 1 to 58 in amounts of money. SUMMARY SHEET "G" is the same history made up in percentages only, the large size of the summaries prohibiting them being combined in one.

In a study of Summary Sheets "G" and "H" and Detail Sheets 1 to 58, it must be remembered that the figures contained there-in do not represent the total tax collections in the years after which given. They are the collection figures of individual yearly levies only and contain no delinquent rolls collectible during the same year. They will also furnish a history of any individual County's General Fund tax levies.

Total collectible rolls in each year and how assembled.

Law of 1899, Page 289, Section 5; provides for the collection of delinquent taxes by making it the duty of the State Auditor to certify to the various Counties, beginning with the levy of 1892 collectible in 1893, the uncollected balance of the levy after the seventh year, thus making any tax levy collectible over a period of seven years. The Counties must add this certified uncollected balance to the amount of the next roll as levied by the State Board, it there-by becoming a part of the next current levy and collectible there-with.

As mentioned on a preceding page the Auditor's records deal with individual yearly levies exclusively and the figures as taken there-from

represent collections of one roll only in any one year. To assemble a current roll and the uncollected balances of the preceding rolls that were collectible as delinquent tax, making the total of all rolls that were collectible in the year. Detail Sheets numbered 59 to 73 were compiled from the collection figures available on detail sheets 1 to 58 or Summary "H". Detail Sheets 59 to 73 give in minute detail the operation of each current roll and the delinquent rolls collectible there-with, separately and combined for a total. The procedure was as follows: Operating under the law of 1899, the first roll the State's record contained was the levy of 1893 collectible in 1894 and known as the current roll of that year. At the end of 1894 the uncollected balance of that roll became delinquent and was collectible as delinquent roll along with the levy of 1894 which was the current roll of 1895 (See page 59). Thus the uncollected balance of 1894 roll with the current roll of 1895 becomes the total roll collectible in 1895. At the end of 1895 the uncollected balances of both those rolls became the delinquent rolls collectible with the next levy in 1896, the three combined, one current and two delinquent being the total collectible in 1896 (See page 60). Keeping up this procedure of bringing in a new current roll each year and reducing the delinquent rolls by each years collections (See pages 60, 61 & 62), we arrive at the levy of 1899 or current roll of 1900, with seven rolls active as follows: 1900 roll as current and the uncollected balances of 1899, 1898, 1897, 1896, 1895 and 1894 as delinquent rolls. At the end of 1900, the levy of 1893 or roll of 1894 had seven collection years and was under the law no longer collectible as a delinquent tax roll. The uncollected balance of that roll was there-fore certified by the State Auditor to the various Counties and added by them to the next levy and became a part of the next current roll

(See page 62). At the time 1894 roll was dropped from the delinquent rolls the 1900 roll having had one years collection becomes delinquent in its place and the 1901 current roll coming in as collectible makes once more seven active rolls for collection in 1901. This procedure was followed through the years from 1894 to the end of 1922, when the uncollected balances of the delinquent rolls of the 1916, 1917, 1918, 1919, 1920 and 1921 levies, which were collectible in 1917, 1918, 1919, 1920, 1921 and 1922, added to the levy of the State Boards in 1922 for collection in 1923, make the total of all rolls collectible in 1923 (See page 73). These figures are in balance with the uncollected amounts as shown by the various rolls in the Auditor's ledgers.

Summaries of Total Collectible Rolls.

For comparative purposes between the years, SUMMARIES "I", "J", "K" & "L" were compiled from detail sheets 59 to 73. Owing to the large number of columns involved it was necessary to divide these summaries into three sections. Summary "I" contains the Millage Rate, Property Valuation, amount of the Board Levy, Delinquent Collectible Rolls, and Total Collectible. Summary "J" contains collections by Current Rolls, Delinquent Rolls and total of All Collectible Rolls. Summary "K" shows the uncollected balances of the rolls on Summary "J" and the operation of same - namely, what part was still collectible as delinquent and what part was dropped and carried to the next current roll. Summary "L" is of percentages only, obtained from Summaries "J" & "K". Summary "L" also shows the average percentages for the periods covered by the various statements.
